

RemotEAR Announces Partnership and Integration with Resonance Products

[Lederach, PA – April 10, 2018] RemotEAR, the tele-audiology company, announces a partnership with Resonance, a full-line manufacturer of hearing diagnostic products based in Italy. The Resonance portable line of devices is now fully compatible with RemotEAR's Deviceware[®] tele-audiology service.

Dave Davis, founder and Managing Partner of RemotEAR commented, "We have been working with the Resonance team for quite a while now to develop and test the integration of their line of screening products with our tele-audiology service. I'm pleased to announce that we are now able to offer a turn-key solution to our customers, ranging from audiometry, to immittance, and OAE utilizing Resonance's platform of highly portable and cost-effective devices. "

The Resonance screening range of devices include the:

- R17A Audiometer
- R16M Middle Ear Analyzer
- R15C Combined Audiometer/Tymp
- R14O Otoacoustic Emissions

Together, they are a truly portable yet powerful line of diagnostic devices, which can be purchased in a range of configurations that are both excellent in their performance, and also very affordably priced.

Resonance and RemotEAR worked together to create a module that enables the Resonance devices to be used with RemotEAR's Deviceware tele-audiology service, enabling hearing care professionals to expand their practice to include remote diagnostic services.

For more information, please see our Whitepaper on the RemotEAR website that outlines the method and technical overview of the integrated system.

About RemotEAR:

RemotEAR holds key patents for remote diagnostics and hearing instrument programming and offers a unique tele-audiology service for the professional hearing care industry. The company's Deviceware® technology platform enables audiologists, dispensers, and other hearing care professionals to remotely administer diagnostic patient testing and hearing aid adjustments, providing important benefits for both the patient and the provider.
